**Subject:** PCIC 2019 Prize Paper Selections

**Reference:** A Practical Application of a Sinewave Filer to Resolve ESP Motor Failures

Gentlemen,

As many know, the IEEE/IAS-PCIC, the Industry Application Society-Petroleum and Chemicals Industry Committee hosts a prestigious conference where authors strive to have their papers and topics selected for presentation. The competition (and sometimes audiences) can be very challenging, but the benefits to the industry through your experience and expertise can be so rewarding.

Today I write to you with gratitude for your efforts in the development, reviews, and presentation of your paper last year at the 2019 PCIC Conference. In addition, to extend my congratulations for your being recognized for the conference's **Third Best Paper** at last year's in Vancouver, BC, Canada.

As I write this letter, the PCIC Local Conference Committee is preparing for this year's PCIC Awards Luncheon on Monday, September 14 at the Atlanta Marriott Marquis. While conference contingencies are being explored, we are hopeful that you are planning to attend so that we can properly recognize you for your excellent work with this paper.

Asking all to be safe and stay healthy I remain, Gratefully Yours,

A handwritten signature in blue ink that reads 'Peter Baen'.

Peter Baen, Chair  
Advisory & Awards  
IEEE/IAS - PCIC

CC: Dennis Bogh, Jim Bowen, and Kevin Peterson: PCIC Executive Officers  
Rick Paes, Chris Heron, Ethan Dong: PCIC Marine Subcommittee Officers  
Paul Sullivan: Papers Review Subcommittee Chair
